

Millard®

GLOBAL QUALITY FILTERS

INDIA 2017 BUYERS GUIDE

PASSENGER VEHICLES

GLOBAL QUALITY

Millard® is the European Brand specialized in high tech filtration systems for the automotive industry. Quality is the essence that inspires us, resulting in filters made for the best vehicle brands in the world.

Millard® offers to its markets, products and services with the highest quality level. Innovation and new technologies allow the vehicle fluids to work in optimal conditions to benefit a conscious energy consumption, environmental care and health of the population.

ISO 9001–2008

ISO 9001–2008

The prestigious German firm TÜV Rheinland, known for its extensive experience in the automotive industry has granted the Certification to Millard®, giving fulfillment to the requirements established by the international norm ISO 9001:2008.

Millard® has an advanced quality assurance system: “Global Quality” that allows us to achieve the industry standards in all the products that we offer, and it's a warranty of original equipment equivalent.

OUR LINE OF PRODUCTS

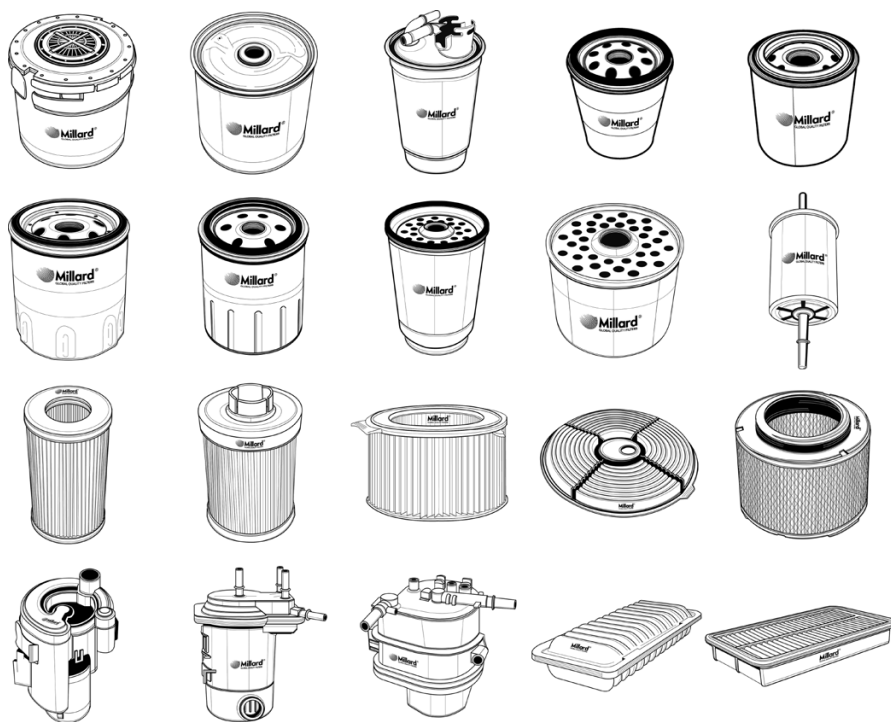

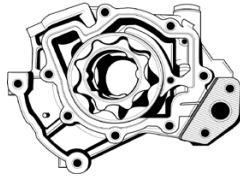

QUALITY IN DESIGN

Millard® product designs meet Automotive Manufacturer's specification requirements. Specifications are updated periodically through Design Reviews to insure perfection in materials and specifications.

QUALITY IN DEVELOPMENT

Development of a Millard® product strictly follows TS16949 norm standard which implies tools such as APQP (Advanced Product Quality Planning).

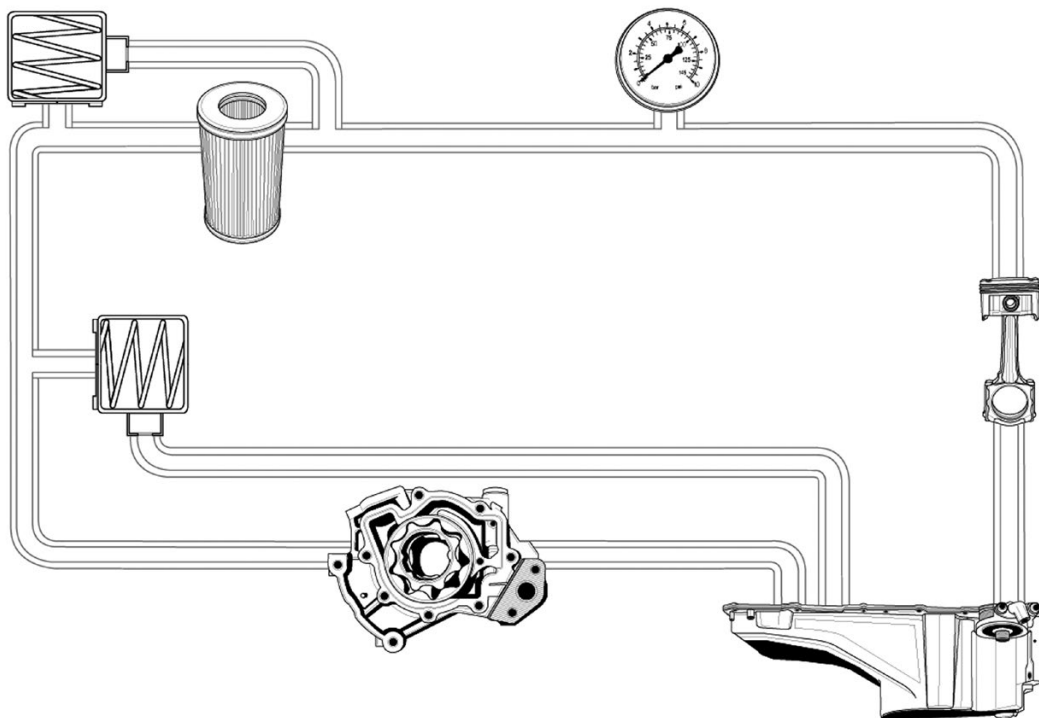

TECHNICAL DATA

QUALITY IN INDUSTRIALIZATION

Millard® strictly monitors its production in various ways, such as FMEA (Failure Mode & Effect Analysis) process tool.

QUALITY IN MANUFACTURING

Millard® sealed filters must pass leak-proof test to eliminate the chances of a defective product would reaching the market..

CABIN FILTERS

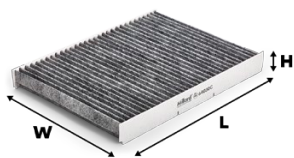

The quality of air in the cabin is guaranteed by millard filters through the most modern technology of pleated geometry in the filter elements and in its easy, true and precise fit, thus avoiding unfiltered air refluxes.

AIR FILTERS

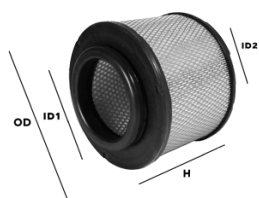

Air is the most important fluid for the vehicle performance.

The efficient working of the rest of the fluids (fuel and oil) depends on the quality of air absorbed by the engine. Millard's technology increases the filtration area, reduces humidity and it is high pressure resistant.

Millard's air filters represent the perfect balance between nature and technology.

FUEL FILTERS

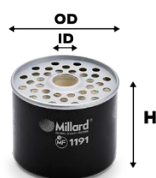

A perfect combustion needs an efficient filter, able to retain polluting agents.

To this end, the cellulosic or synthetic media allows fuel to reach the optimal performance.

In diesel vehicles, thanks to our pleating technology and Millard's experience in the most demanding injection and common rail systems, help to keep away the particles generated by oxidation and water condensation.

OIL FILTERS

Oil reduces engine wear,
cools components and
protects engine from erosion.

Millard's technology takes
care of the engine against
the particles produced in
the combustion, dust and
abrasive fragments which
increases engine friction.

At the same time, our oil
filters maintain the right
viscosity removing the
sludge and contaminants,
satisfying original equipment
manufacturer's required
levels.
