GLOBAL QUALITY

Millard® is the European Brand specialized in high tech filtration systems for the automotive industry. Quality is the essence that inspires us, resulting in filters made for the best vehicle brands in the world.

Millard® offers to its markets, products and services with the highest quality level. Innovation and new technologies allow the vehicle fluids to work in optimal conditions to benefit a conscious energy consumption, environmental care and health of the population.

ISO 9001-2008

ISO 9001-2008

The prestigious German firm TÜV Rheinland, known for its extensive experience in the automotive industry has granted the Certification to Millard, giving fulfillment to the requirements established by the international norm ISO 9001:2008.

Millard has an advanced quality assurance system: "Global Quality" that allows us to achieve the industry standards in all the products that we offer, and it's a warranty to original equipment equivalent.

OUR LINE OF PRODUCTS

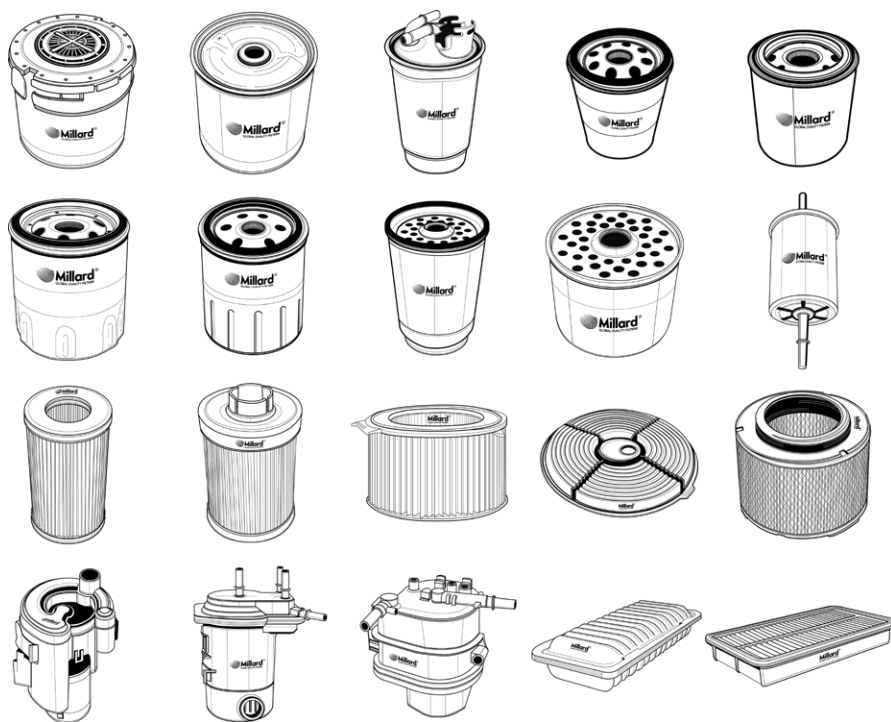

QUALITY IN DESIGN

Millard® product designs meet Automotive Manufacturer's specification requirements. Specifications are updated periodically through Design Reviews to insure perfection in materials and specifications.

QUALITY IN DEVELOPMENT

Development of a Millard® product strictly follows TS16949 norm standard which implies tools such as APQP (Advanced Product Quality Planning).

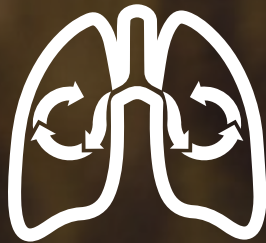

CABIN FILTERS

Air quality inside the passenger's cabin is guaranteed by Millard cabin filters through the latest technology in pleating geometry, high tech synthetic fibers with and without activated carbon and its easy and accurate fitting, trapping health threatening agents such as allergens and bacteria.

AIR FILTERS

Air is the most important fluid for the vehicle performance. The efficient working of the rest of the fluids (Fuel and Oil) depends on the quality of air absorbed by the engine. Millard's technology increases the filtration area, reduces humidity and it is high pressure resistant. Millard's air filters represent the perfect balance between nature and technology.

FUEL FILTERS

A perfect combustion needs an efficient filter, able to retain polluting agents. To this end, the cellulosic or synthetic media allows fuel to reach the optimal performance. In diesel vehicles, thanks to our pleating technology and Millard's experience in the most demanding injection and common rail systems, help to keep away the particles generated by oxidation and water condensation.

OIL FILTERS

Oil reduces wear, cools components and protects engine from erosion. Millard's technology takes care of the engine against the particles produced in the combustion, dust and abrasive fragments which increases engine friction. At the same time, our oil filters maintain the right viscosity removing the sludge and contaminants, satisfying original equipment manufacturer's required levels.
